STP GLOBAL CABLE

GENERAL INFORMATION

STP Global Cable is one of the largest and most advanced cable and electrical equipment manufacturers in the region.

Production of cable

The Cable Plant, operating since 2009, carries out production entirely using European technology. Raw materials sourced from leading European companies are tested in a modern laboratory. STP is the only company in the country that produces fiber-optic cables. The plant manufactures telephone cables (10–600 pairs), fiber-optic cables, LAN cables, and coaxial cables.

Production of electrical equipment

The electrical equipment plant, operating since 2010, produces high-quality products using modern technologies. Since 2011, it has been producing MVC module-type slots, LVEC (low-voltage electric cabinets), terminals, and cable trays. All products are tested using equipment made in the USA.

PRODUCTION CAPACITY

CABLE PRODUCTION CAPACITY:
120 000 tons annually

ELECTRICAL EQUIPMENT
PRODUCTION CAPACITY:
2 000 tons annually

AREAS OF ACTIVITY:

CABLE PRODUCTION
ELECTROTECHNICAL ROD PRODUCTION
ELECTRICAL EQUIPMENT PRODUCTION

SECTORS:

OIL AND GAS
CONSTRUCTION
AGRICULTURE
ENERGY

EXPORT

- UKRAINE
- TURKMENISTAN
- RUSSIA
- UZBEKISTAN
- KYRGYZSTAN
- TAJIKISTAN
- KAZAKHSTAN
- GEORGIA

EQUIPMENTS

TROESTER – GERMANY
MAILLEFER – FINLAND
NIEHOFF – GERMANY
ROSENDAHL – AUSTRIA
POURTUER – FRANCE
CABALLE – SPAIN
CORTINOVIS – ITALY

OUR STRENGTHS AND ADVANTAGES

Cable production

Our production facilities include a **500 kV XLPE** insulated cable production line (tower) and a laboratory for **10–500 kV** testing in five countries. We are the only fiber-optic cable manufacturer in the country.

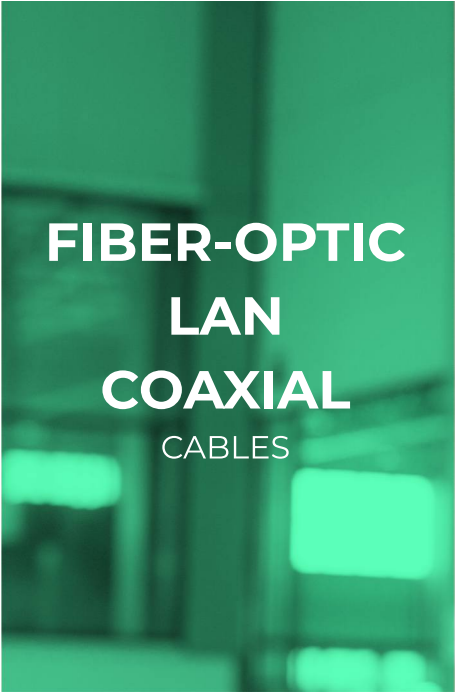

In December 2012, the Cable Plant was admitted to the “Intercable” International Association. The plant is currently capable of producing products that meet the requirements of **AZS, GOCT, VDE, IEC** international standards, and **TS** standards. The production capacity of the Cable Plant is **120 thousand tons per year**.

Electrical Equipment

The Electrical Equipment production area has been operating at full capacity since 2010. High-quality products are manufactured according to **European standards** and modern requirements.

Production is carried out using computer-controlled machines and equipment with advanced technologies. Since 2011, STP Global Cable has been producing **MVC** module-type slots, **LVEC** (low-voltage electric cabinets), various types of **terminals**, and **cable trays**.

OUR PRODUCTS

STP GLOBAL CABLE

PRODUCES A WIDE RANGE OF CABLE PRODUCTS:

HIGH-VOLTAGE (110–500 kV) power cables – reliable and durable solutions for energy transmission.

MEDIUM (35–110 kV) and **LOW** (10–35 kV) voltage power cables – suitable for industrial and household applications.

FIBER-OPTIC CABLES – for high-speed data transmission.

LAN cables – for network and internet connections.

COAXIAL CABLES – for television and communication systems.

TELEPHONE CABLES (10–600 pairs) – for fixed communication lines.

CABLE TRAYS and accessories – for installing cable infrastructure

All products are manufactured and tested according to international standards.

Rubber-insulated flexible power cable

Fiber-optic cables

LAN and connection cables

Coaxial cables

Submarine cables

Medium voltage power cables
(6kv-35kv)

Medium voltage three-core power cables
(6kv-35kv)

High voltage power cables
(64 kv-110kv)

Extra-high voltage power cables
(220kv-500kv)

QUALITY CONTROL

Production of cables

All cables produced by **STP Global Cable** are tested in laboratories using methods that comply with the latest international standards.

The laboratory equipment is used for testing low-, high-, and extra-high-voltage cables **up to 500 kV**. In December 2012, the Cable Plant was admitted to the “Intercable” International Association.

The plant is currently capable of producing products that meet the requirements of **AZS, ROCT, VDE, IEC** international standards, and **TS** standards.

 info@stp.az / sales@stp.az

STP collaborates with companies across various sectors through its industry-compliant production capabilities and quality-driven approach.

Our technologically advanced equipment and adaptable production infrastructure empower us to offer partners high-quality, functional solutions.

Our proven systems and skilled specialists ensure that every partnership is built on a reliable and trustworthy basis.

If stability and functionality are your priorities in manufacturing, partnering with STP may be the right choice.
