PRODUCTS AND SERVICES

Kabel istehsalı

STP Group of Companies' **Cable Manufacturing** Division is one of the region's leading cable manufacturers, with production built on advanced technology and international quality standards.

The facility manufactures:

- Low, medium, and high-voltage power cables
- Industrial and telecommunication cables
- Oil well cables and fire-resistant cables
- Fibre-optic cables
- Wires for various applications

Modern, fully automated production lines, high-precision technology, and advanced laboratories ensure that all products meet **international quality standards**. The manufacturing process uses innovative materials along with environmentally efficient, energy-saving technologies, which enhance the reliability and durability of the products.

Produced under the "**Made in Azerbaijan**" brand, the products are exported to **European, CIS, and Middle Eastern** markets. Guided by the principles of high quality, innovation, and reliability, the Cable Manufacturing Division is today recognized as a trusted partner in both local and international markets and continues to strengthen its position in the global cable industry.

OUR STRENGTHS AND ADVANTAGES

Cable production

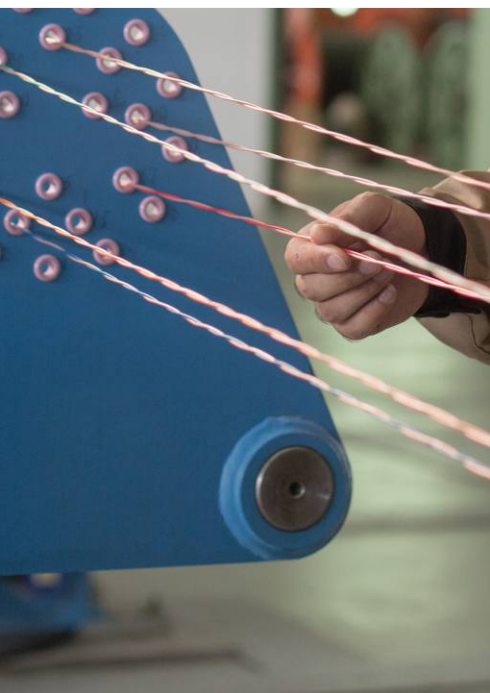

The cable plant has an annual production capacity of **120,000 tonnes**. The facility manufactures a broad portfolio of cable and wire products that meet the requirements of **AZS**, **GOST**, **VDE**, **IEC** and **TS** international standards. The plant is equipped with a **500 kV XLPE-insulated high-voltage cable production line (VCV tower)** - a capability held by only a handful of manufacturing facilities worldwide. Its in-house **10–500 kV high-voltage laboratory** enables testing of all manufactured products to international standards and ensures full quality control.

As Azerbaijan's only producer of optical cable, the plant delivers high-technology solutions for both power and telecommunications infrastructure.

In December 2012, the cable plant was admitted to the **"Intercable" International Association**. This membership further affirms the company's recognition within the global cable industry and the alignment of its production processes with leading international standards.

FIBER-OPTIC LAN COAXIAL CABLES

OUR PRODUCTS

PRODUCES A WIDE RANGE OF CABLE PRODUCTS:

HIGH-VOLTAGE (110–500 kV) power cables – reliable and durable solutions for energy transmission.

MEDIUM (35–110 kV) and **LOW** (10–35 kV) voltage power cables – suitable for industrial and household applications.

FIBER-OPTIC CABLES – for high-speed data transmission.

LAN cables – for network and internet connections.

COAXIAL CABLES – for television and communication systems.

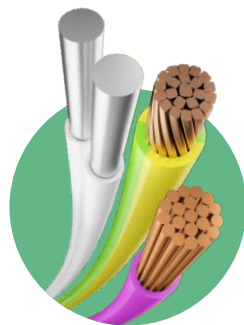

TELEPHONE CABLES (10–600 pairs) – for fixed communication lines.

CABLE TRAYS and accessories – for installing cable infrastructure.

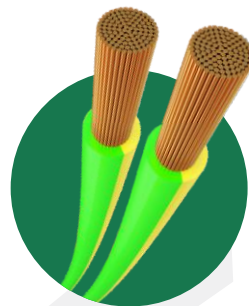

All products are manufactured and tested according to international standards.

**Extra-high voltage
power cables**
(220kv-500kv)

QUALITY CONTROL

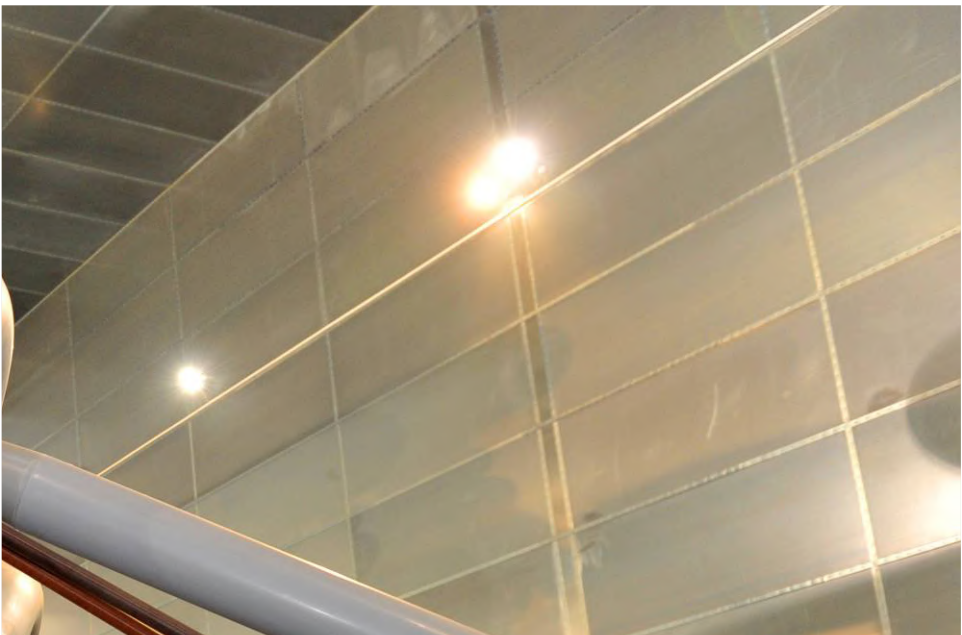

Cable Production

Every cable produced at the STP Group of Companies **cable plant** undergoes rigorous verification in the plant's dedicated testing laboratories, applying test methods aligned with the most current **international standards**.

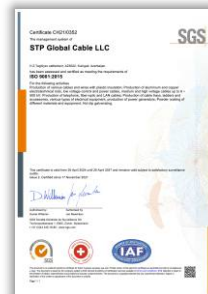

The laboratory's equipment supports the testing of low-voltage, high-voltage and extra-high-voltage cables up to 500 kV, providing complete quality assurance across the plant's entire product range. In December 2012, the cable plant was admitted to the **"Intercable" International Association** - a recognition of its standing within the global cable industry.

Today, the plant is qualified to manufacture products conforming to the requirements of the **AZS, GOST, VDE** and **IEC** international standards, as well as **TS** standards.

STP collaborates with companies across various sectors through its industry-compliant production capabilities and quality-driven approach.

Our technologically advanced equipment and adaptable production infrastructure empower us to offer partners high-quality, functional solutions.

Our proven systems and skilled specialists ensure that every partnership is built on a reliable and trustworthy basis.

If stability and functionality are your priorities in manufacturing, partnering with STP may be the right choice.
